

2014-2019 Tundra Prodigy P2 Brake Controller Mounting Kit

Part# TP2MNT

Installation Instructions Please read **FIRST** if using on 2015 and newer, Use only steps 3, 4 and 5

1----Remove the driver side sill plate and kick plate

2---Remove 2 10 mm bolts holding lower dash finish panel and carefully pull off

3---Disconnect Battery **(2016 and newer)** Remove right side upper dash trim plate, unplug switches, the one with the tow haul switch and trac off switch. Remove switches from plate and install into P2 Mounting Plate.

4---Using the 2 screws provided in kit and the metal bracket provided with your controller, push your P2 brake controller into front of P2 Mounting Plate and install screws into original holes in P2 brake controller

5---Install wiring for P2 mount per instructions with P2, Plug in all switches and reinstall all panels. Done!

IF YOU HAVE ANY QUESTIONS INSTALLING, PLEASE CALL EARL AT 951-858-3418 BEFORE RETURNING! NO RETURNS WILL BE ACCEPTED WITHOUT PRIOR AUTHORIZATION.
